

# 'POWER' FULL EXAM MANAGEMENT

RECRUITMENT MADE EASY

## ENERGY SECTOR

### - Increasing Demand, Increasing Investments!

Energy Sector in India is the fastest growing in the region – with an estimated ‘business – as – usual’ growth of over 3% every year. India will account for an estimated 95% of energy investment requirements in South Asia in the coming two decades.

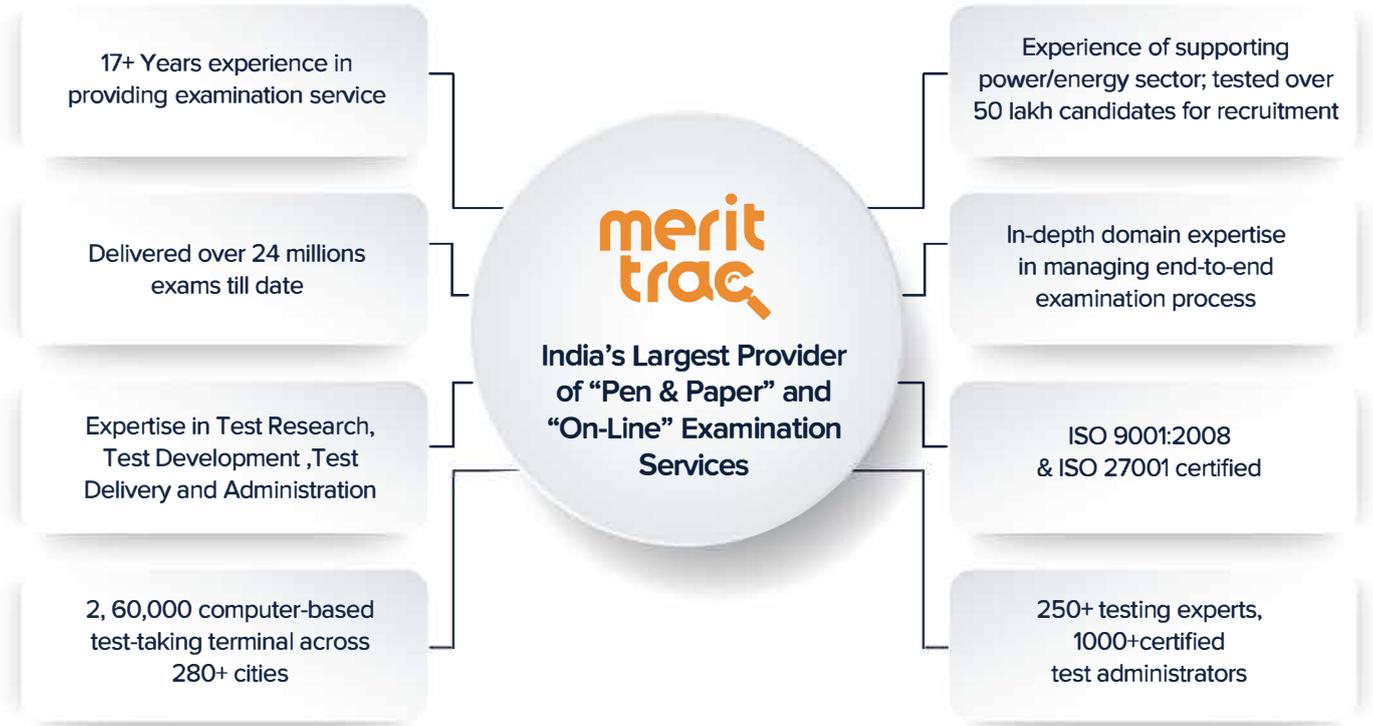

There is an increasing need for energy – Hydro-electric Power, Coal, Nuclear Energy, Petroleum Products. This need is stressing the necessity to produce and distribute power across the length and breadth of the country. Organizations in the sector are devising strategies to meet this demand and an important factor that can help this cause is Human Capital.

Recruiting and maintaining skilled human resources is critical in meeting the growing demand. In order to achieve this, organizations should tap high-quality resources from across the country.
